

# Lovely Lane Methodist Church

Location: 42<sup>nd</sup> St. NE  
Cedar Rapids, Iowa

Completed: Winter 2003

Size: 5,700 s.f.

Construction: Precast concrete &  
wood framing with  
wood siding

Developer: Lovely Lane  
Methodist Church

Next to Kennedy High School, on the Northeast side of Cedar Rapids, Lovely Lane Methodist Church was looking to add additional classroom, library, preschool, youth lounge, choir practice, and meeting space to their existing facility. The addition allowed for a distinctive separate entrance from the main chapel entry.

The addition is constructed on a sloped portion of the site with a walk-out lower level. The structure incorporates concrete walls on the lower level with precast concrete floor planks on the upper level.

In order to seamlessly tie the new in with the existing, wood siding was provided to match the existing building and runs over both the upper wood framed walls and the concrete walls of the lower level.

The addition was designed to allow for the installation of a future elevator, as funds became available.
